2.  Comment: Percentage is used as another means of expressing planned number of units. 100 percent expresses one unit. Thus, for example, in Item 1 - Seiners - the figure 2,555 percent means that the plan calls for 25 seiners to be completed and 55 percent of the 26th seiner to be finished within the period of the plan. Again, the 30 percent for tankers for internal waterways - Item 5 - means that the plan calls for the completion of only 30 percent of the first of these vessels.
